Name	Imoru Mayowa Peter
STUDENT ID/REGISTRATION NUMBER	202521396FD
Course Code	SBT_DF205
Course Title	Basic Computer Skills for Digital Forensics
Lab Title	Mobile and IoT Forensics Case Study
Recommended Environment	Windows 10/11 host or Powershell and CMD
Estimated Duration	3 hours
Submission Format	One PDF report plus the created .bat files and-output evidence files
Course Code	SBT_DF205
Instrustor name	Aminu Idris AMCPN
Date	26 October, 2026

Case Reference: SBT-DF205-C1

NUMBER	FIELD	DETAILS
1	Case Reference	SBT-DF205-C1
2	Evidence Description	Android 10 Google Pixel 3 Non-Cellebrite Extraction
3	Source URL	https://digitalcorpora.s3.amazonaws.com/corpora/mobile/android_10/Non-Cellebrite%20Extraction/Pixel%203.zip
4	Archive Name	Pixel 3.zip
4	Archive Size	5.25 GB (approx.)
5	Date/Time Received	_____
6	Examiner	Imoru Mayowa Peter
7	Operating System	Windows 10 / Linux (specify used system)
8	Archive Tool	7-Zip v____ / WinRAR v____
9	SQLite Tool	DB Browser for SQLite v____
10	ExifTool Version	_____
11	Spreadsheet Tool	Microsoft Excel / LibreOffice Calc
12	Evidence Storage Location	_____
13	Remarks	Archive acquired from Digital Corpora

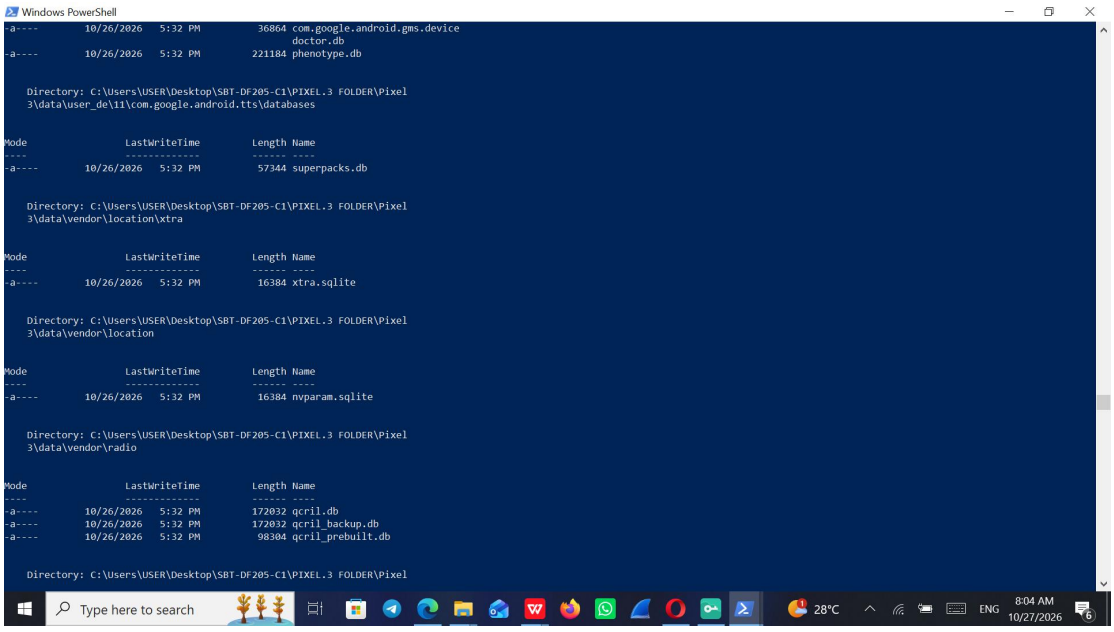

REPORT

Archive Name: Pixel 3.zip
Archive Size: 524,782,089 bytes (approximately 500 MB)

SHA-256 (Baseline):
CA6918EF8B20486B6A5DED15609AC51318F377829480F93BE3BA15364A8AA00A
Method:

The SHA-256 hash was calculated using Windows PowerShell with the
Get-FileHash command before extraction. No trusted manifest was supplied;
therefore, the calculated SHA-256 value was recorded as the baseline
integrity hash for the evidence archive.
Tool:
Windows PowerShell
Result:
The baseline SHA-256 value was successfully generated and recorded.

TASK 3.

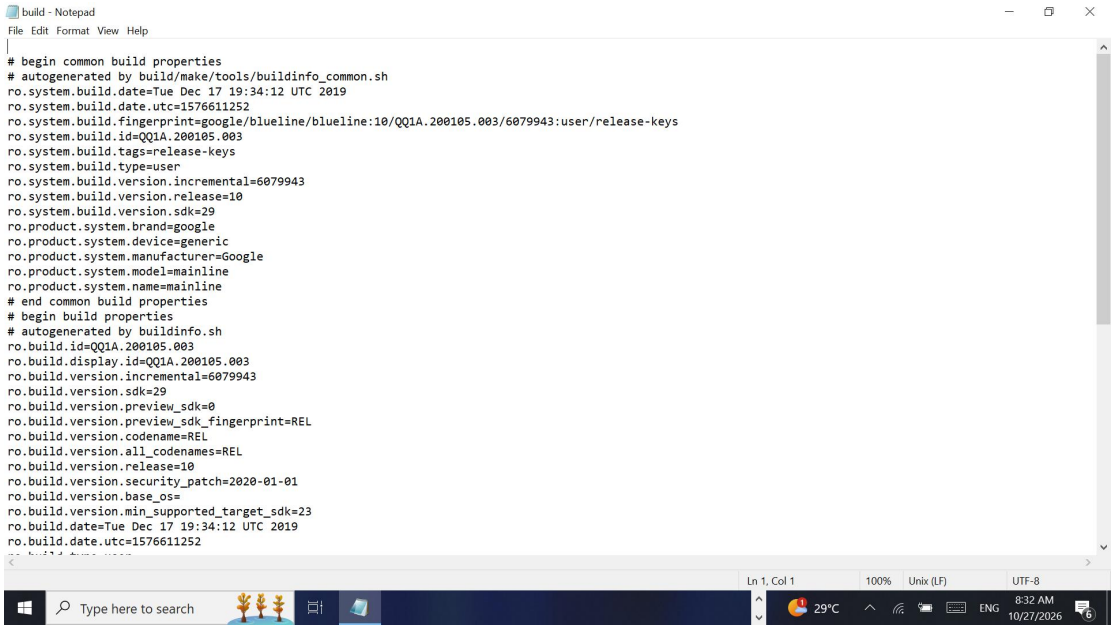

REPORT;

An evidence register was created for selected artefacts extracted from the Pixel 3 evidence archive. File sizes, source paths, and SHA-256 hash values were recorded. Processing activities were documented, and all identified

database sidecar files were preserved to maintain evidential integrity. The archive hash verified successfully before and after examination, confirming that the evidence remained unchanged throughout the handling process.

TASK 2

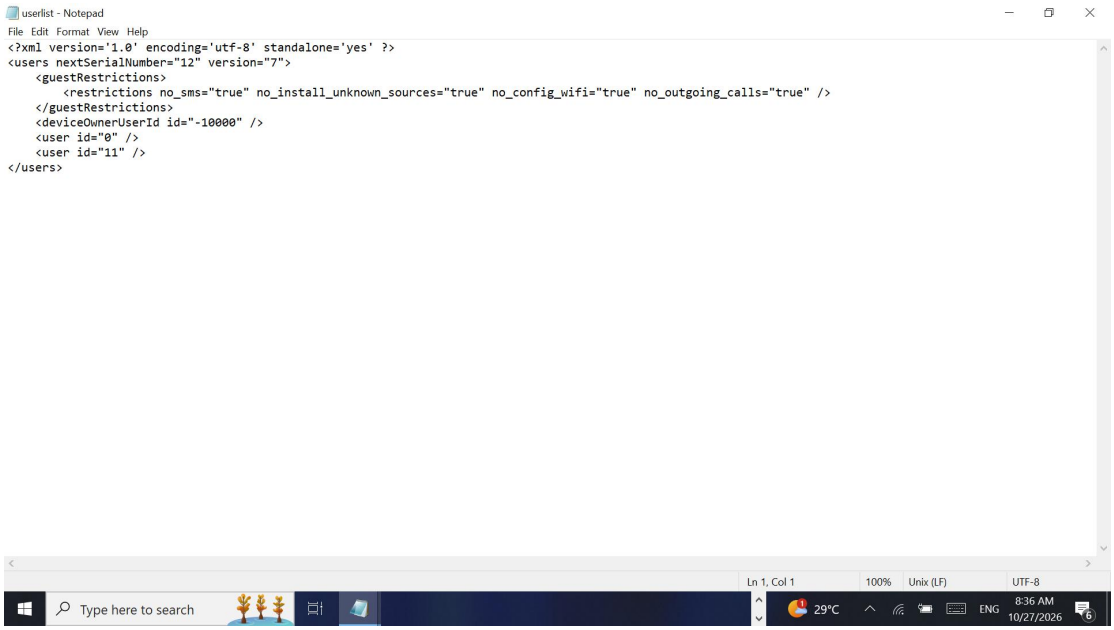

2.1

Report

The device identity was established using the build property file. The manufacturer was identified as **Google** from ro.product.system.manufacturer=Google. The Android version was identified as **Android 10** from ro.build.version.release=10. The build identifier was **QQ1A.200105.003** from ro.build.id=QQ1A.200105.003. The security patch level was **2020-01-01** from ro.build.version.security_patch=2020-01-01. The build fingerprint google/blueline/blueline/10/QQ1A.200105.003/... indicates the device family is **Pixel 3 (codename: blueline)**.

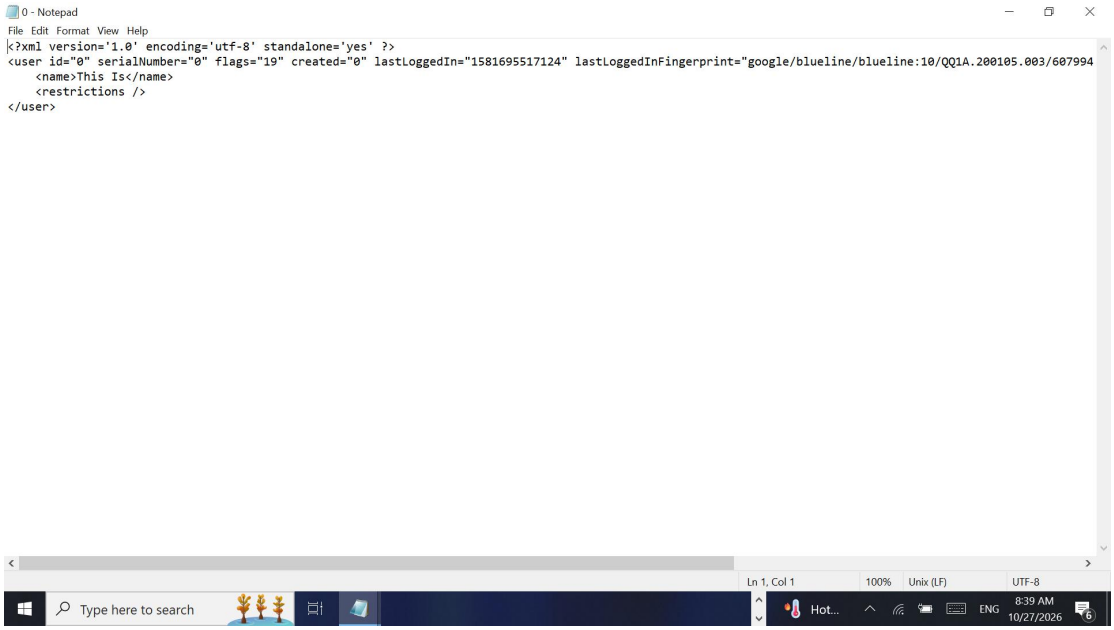

Task 2.2

Note;

The examination of data/system/users/userlist.xml identified two configured user profiles on the device. The file lists User ID 0 and User ID 11, indicating multiple profiles were present on the handset.

2.3

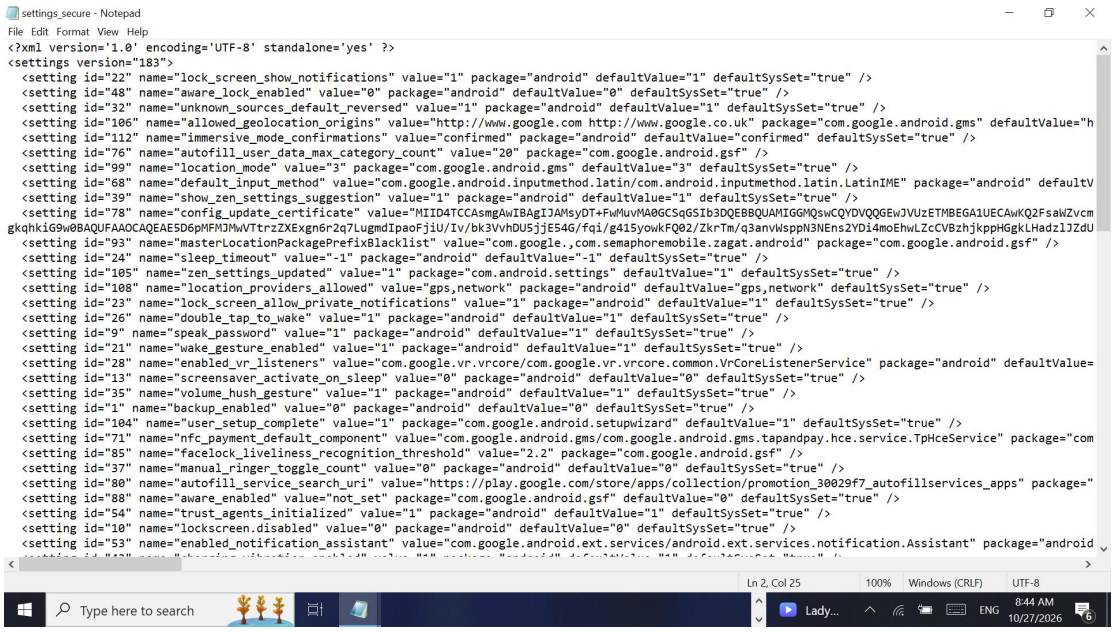

Note;

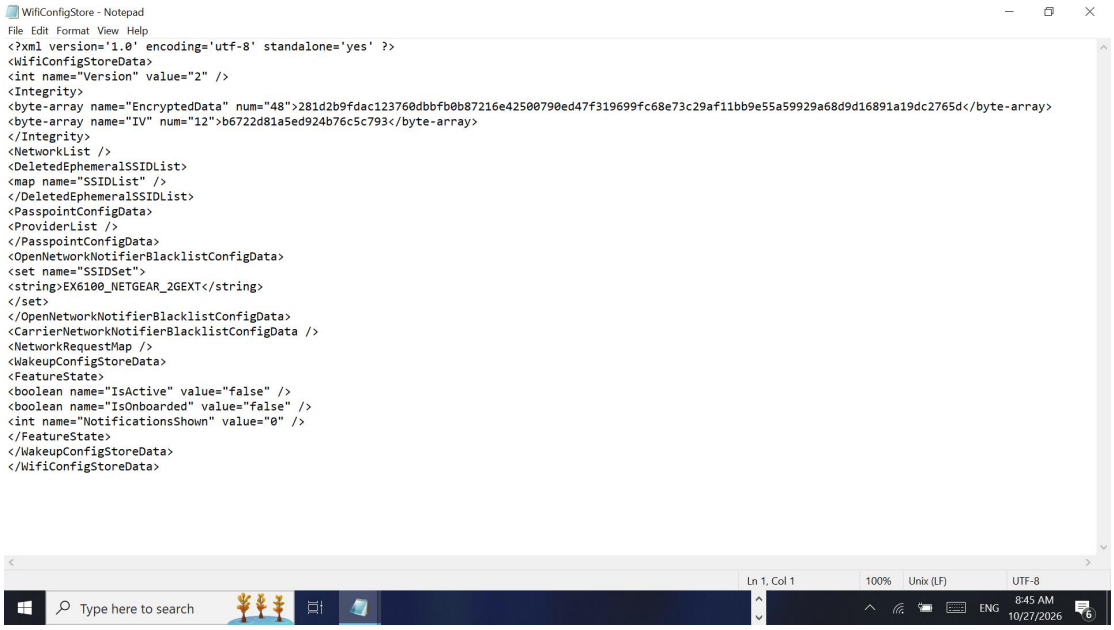

The User profiles were analysed separately. The presence of User ID 0 and User ID 11 indicates multiple profiles were configured on the device. Activity associated with a profile cannot automatically be attributed to a specific and individual because devices may be shared, credentials may be used by others, and some actions may be generated automatically by applications or the operating system.

TASK 3

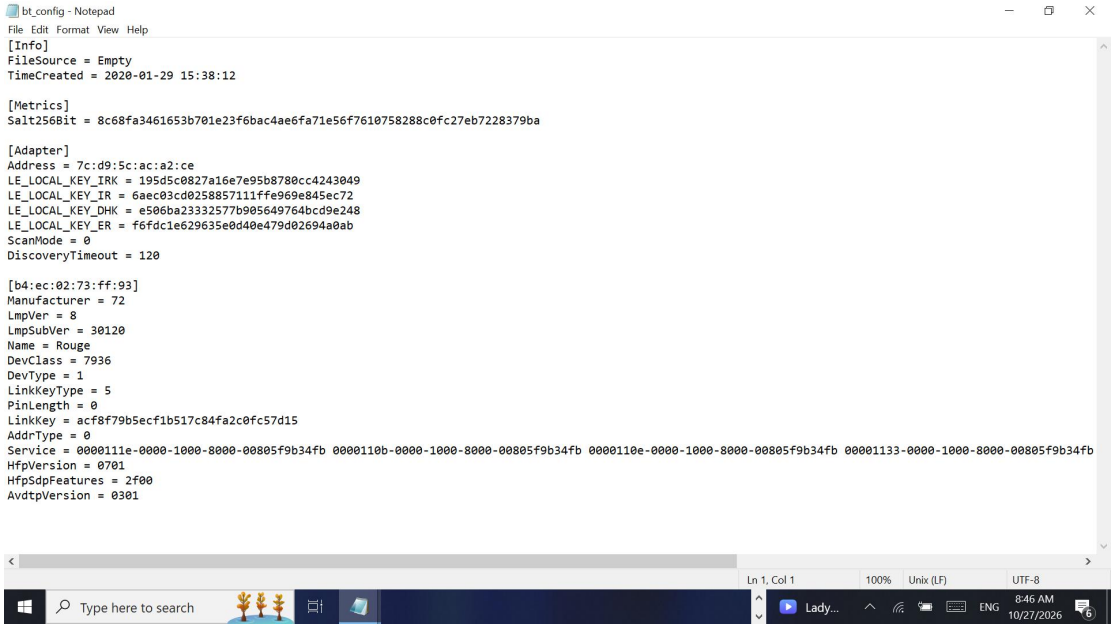

3.1

3.2

3.3

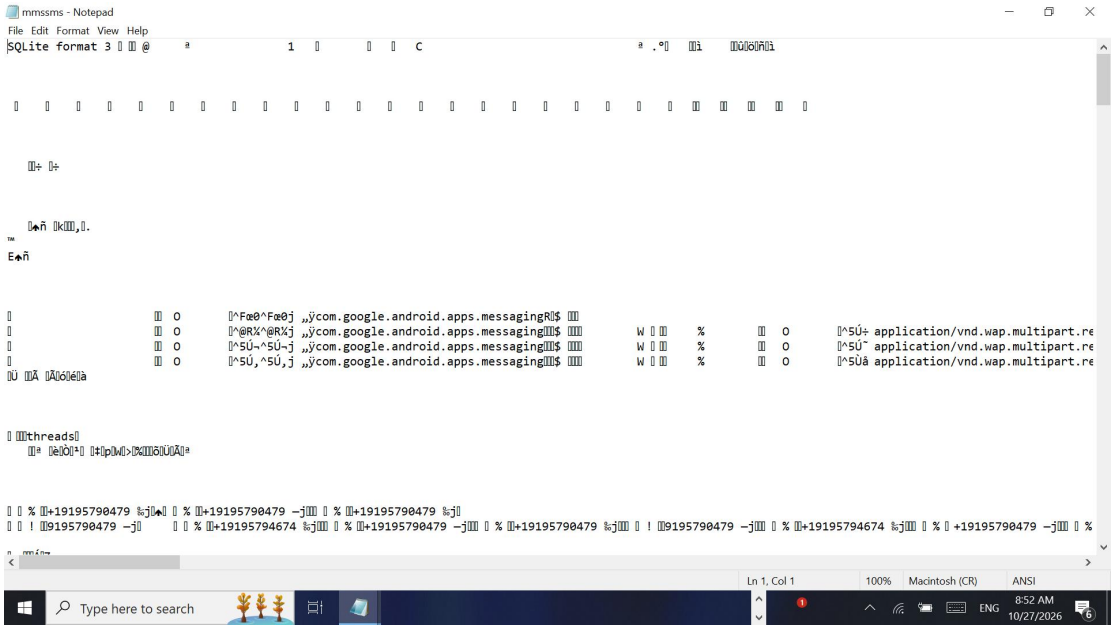

NOTE;

CATEGORY	KEY	VALUE
Secure	blutooth_on	1
System	Screen_brightness	102

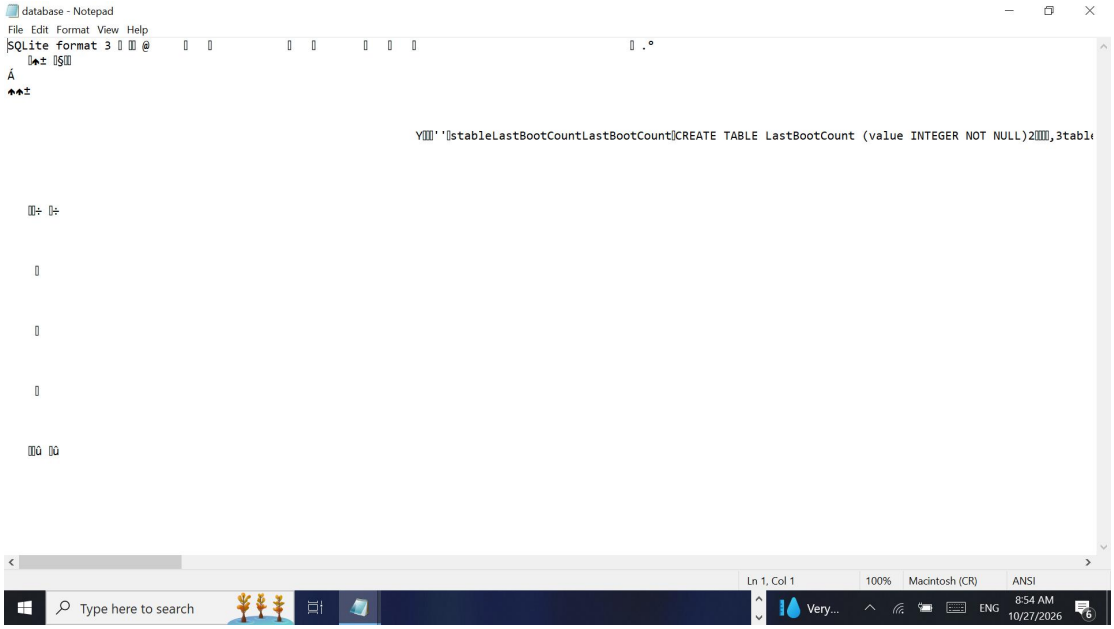

The identified Wi-Fi networks represent saved configurations on the device. A saved SSID indicates the device knew about the network but does not by itself prove a connection occurred at a specific time. Additional timestamped logs would be required to demonstrate a confirmed connection.

TASK 4

4.1

4.2

NOTE;
The evidence does not conclusively prove that the device owner visited the location. A Maps search may occur without travel, and a photograph may be received from another source or captured by another individual. Therefore the correlation is suggestive rather than definitive.

Task 8

SBT-DF205_Case1_Imoru-Mayowa-Peter.zip through E-Campus
